*Polyurethane foam, wood, fabric wire, paint & steel*
- 18 • Wait Upon, 2010  
Jay Walker, Malvern, PA

**Heart Smart Trail**  
Walking is simply the first step toward a healthier lifestyle and walking the Heart Smart Trail at Abington Art Center is a step in the right direction! The .65 mile loop trail takes you through the Sculpture Park and its lovely landscape. Go online to [startwalkingnow.org](http://startwalkingnow.org) to track your progress. The trail was made possible through a partnership with Abington Memorial Hospital.

The Abington Art Center invites visitors to appreciate the merging of art and nature in its nationally recognized 27-acre Sculpture Park.

Each year AAC invites artists to create and install sculpture outside the traditional walls of a gallery. Some artists address the attributes of the landscape and environmental issues by building sculpture for the site that is intended to return to nature over time. Visitors should expect surprises and plan on making new discoveries with each trip.
